

NAME: Gabriela (Gaby)

LOCATION: El Paso, Texas

AGE: 9

Gaby was born 9 years ago, the third child of the family. From the very beginning we knew she was special. She was always happy but was always sleepy, seemed to be exhausted and ate very little, and as she grew she started to miss one developmental milestone after another (playing

with her feet, rolling over, sitting on her own, etc.)

Gaby started therapy at 6 months and has not stopped, and even though she is non-verbal, wheelchair bound and gets a little stressed with loud noises, she enjoys the company of her friends and family. She is always happy and her smile brightens up our world and those around her. She loves children songs and riding her swing.

Gaby works hard every day during her therapies (Occupational, Physical and Speech) and is an inspiration to everyone around her. She has been a blessing to our family as she has brought a higher sense of purpose to all of us.

Please help us bring awareness and to find a cure for rare genetic diseases, including HNRNP2 mutations.
